SKUA Nature  
Travels Training and Research

SKUA Nature is operating on the realization of birdwatching and nature tours all over the world and training courses on various naturalistic issues. It's one of the few present reality in this field with a scope so wide. The multidisciplinary character of our activities is what typify our organization. We work with success collaborating with public and private subjects to realize projects aiming at nature promotion and its development. Our staff consists of experts in different areas able to deal with every theme concerning habitat and species conservation, environmental education, touristic valorization and naturalistic research.

# DISCOVERING THE "BEL PAESE"

An incredible country full of history and tradition with some of the most beautiful cities in the world, as Venice and Rome. An extremely varied land where in a few kilometers it's possible to travel from warm Mediterranean sea to the top of the Alps, passing through picturesque views and environments rich in fauna and flora. We take you to discover this treasure with local expert guide placed all over Italy. Our mission is to offer you experiences in which naturalistic observations are joined with rich gastronomic and folkloristic aspects that only the most beautiful country in the world can give you!

For a long time, Italy has been largely shunned by foreign birders due to rumors such as "There is nothing to see in Italy! Don't they shoot even Italian Sparrow there?" (of course, a pure fabrication). Today hunting pressure has decreased a lot, and there is nothing to worry about being a binocular-carrying tourist in Italy any more!

So you can have breakfast with Gull-billed Tern in the Po Delta wetlands and dinner with Hazel Grouse in the Central Alps. Or you can see all the European Herons in less than one day in Piedmont.

ALL THE HERONS IN ONE DAY

BIRDS & WINE

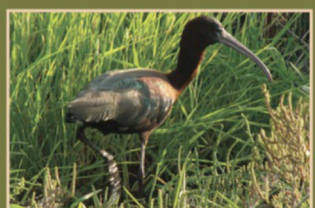

DRAGONFLY WATCHING TOURS

BEARS & WOLVES WATCHING

and you can find MORE ACTIVITIES in the Discover Italy Nature section on our website! [www.skuanature.com](http://www.skuanature.com)
